

## Punch-Tech - Five Holes Across with All Punches Activated

Adjusting product size range by activating/deactivating punches and programming punch position.

Example below with five holes across on 2.25" center distance between holes.

Five across tags can be up to 2" wide each with .25" gutters.

Punch assemblies can be produced to meet customer requirements for hole size, shape and spacing.

## Punch-Tech - Five Holes Across with Punches 2 and 4 Activated

Example below uses the same punch assembly as above but with only punches 2 and 4 activated.

Two across tags can be up to 4.25" wide with a .25" gutter.
